The screenshot shows a Google Colab notebook titled "Copy of Assignment\_1.ipynb". The notebook is open in a web browser, and the code editor is visible. The code is as follows:

```
import datetime
day_delta=datetime.timedelta(days=1)
start_date=datetime.date(2023,1,1)
end_date=datetime.date(2023,2,10+1)
for i in range((end_date - start_date).days):
    print(start_date + i*day_delta)
```

The output of the code is a list of dates from 2023-01-01 to 2023-01-11, printed one per line. The notebook interface includes a menu bar (File, Edit, View, Insert, Runtime, Tools, Help), a toolbar with icons for file operations, and a status bar at the bottom indicating the notebook is "completed at 3:11 PM".
